SUMMARY

Detail-oriented Data Analyst with 1.5 years of experience in data cleaning, reporting automation, and dashboard development. Skilled in SQL, Python, Excel, Google Sheets, and Looker Studio to convert complex datasets into actionable insights. Expertise in KPI reporting, workflow automation, and data visualization enhances decision-making and reporting effectiveness.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Data Validation

Data Visualization And BI: Looker Studio, Dashboard Development, KPI Reporting

Tools: Microsoft Excel, Google Sheets, MySQL, GitHub, VS Code

Python Libraries: Pandas, NumPy

Professional Skills: Workflow Automation, Stakeholder Management, Cross-functional Collaboration

EXPERIENCE

Data Analyst

MCPL

June 2025 – Current

Indore, MP

- Developed business intelligence dashboards in Google Sheets and Looker Studio for project tracking and KPI monitoring, enhancing visibility of key metrics.
- Collaborated with railway stakeholders to gather reporting requirements and deliver actionable insights.
- Cleaned, validated, and transformed large volumes of unstructured tender data for reporting and analytics.
- Automated reporting workflows and dashboard refresh processes, minimizing manual effort and expediting data access.
- Built a Unit Price Matcher solution using fuzzy matching techniques to improve tender evaluation efficiency.
- Designed advanced Google Sheets solutions to streamline data management and improve productivity.
- Implemented automated email notifications and workflow triggers to enhance coordination and accelerate execution timelines

Data Analyst Intern

Sparsh Magic

Sep 2023 – Dec 2023

Indore, MP

- Automated attendance calculations for working hours, late arrivals, and summaries to streamline reporting process.
- Implemented geo-location-based attendance validation to improve data accuracy.
- Developed attendance tracking and reporting solutions with Google Forms and Google Sheets to enhance data collection efficiency.
- Reduced manual administrative effort through workflow automation and reporting improvements.
- Acquired practical experience in KPI tracking, dashboarding, and business reporting to support data-driven decision making.

PROJECTS

Railway Tender Financial Performance Dashboard

Data Analytics

Confidential

Google Sheets, Looker Studio

- Developed an executive dashboard for monitoring a multi-crore railway tender portfolio using six business-critical KPIs.
- Automated reporting by consolidating multiple spreadsheets into a centralized analytics solution.
- Performed billing versus collection analysis to identify collection delays and support financial planning.
- Created risk-monitoring indicators that enabled early identification of potentially delayed tenders.
- Improved visibility of project performance through real-time dashboard reporting.

Video Game Success Analysis

Data Analysis

Personal Project
Python, Pandas, SQL

- Performed end-to-end data cleaning, preprocessing, and exploratory analysis on gaming dataset.
- Used SQL and Python to analyze relationships between game genre, platform, and commercial performance.
- Engineered analytical features to identify trends influencing game success across multiple years.
- Developed insights and visualizations simulating real-world product analytics workflows.

Virtual Mouse

HCI

Minor Project - College
Python, OpenCV, MediaPipe

- Developed a touchless virtual mouse interface using real-time hand gesture recognition for cursor movement, clicks, and scrolling.

EDUCATION

CDGI

B.Tech. in Artificial Intelligence and Data Science

Indore, MP
Aug 2021 – June 2025

CERTIFICATIONS

- Cisco Data Analytics
- AWS Academy Cloud Foundations
- Cyber Security and Ethical Hacking - MSME
